

# PROGRAMMING WITH PYTHON

**BUILD YOUR SKILLS**  
WORKSHOP SERIES

[GO.GWU.EDU/LIBWORKSHOPS](https://go.gwu.edu/libworkshops)

# Today's Instructor

- Dan Kerchner

[kerchner@gwu.edu](mailto:kerchner@gwu.edu)

Materials: [go.gwu.edu/pyw](https://go.gwu.edu/pyw)

# Today's Plan

~2.5 hours:

Basic Python  
Language Concepts

1 hour

Lunch  
Break

~2.5 hours

Data Analysis with  
Pandas

# About today...

- Ask questions!
- If you're stuck:
  - Ask us
  - Help each other out!
- If something is confusing in the workshop, it probably needs improvement; let us know.
- Stay as long as you like

# Objectives

- Gain familiarity with one environment for using Python (Google Colab), and awareness of others
- Learn Python language basics
- Load in a data set as a Pandas DataFrame
- Explore and transform ("wrangle") the DataFrame
- Create data visualizations
- Learn how to look things up, how to interpret errors
- Gain confidence to try things we didn't learn today!

# Why Python?

- Free
- General purpose
- Easy to learn
- Readable\*
- Community-developed / Open Source
- Widely used and documented
- Good built-in and contributed libraries

# Different ways to use Python

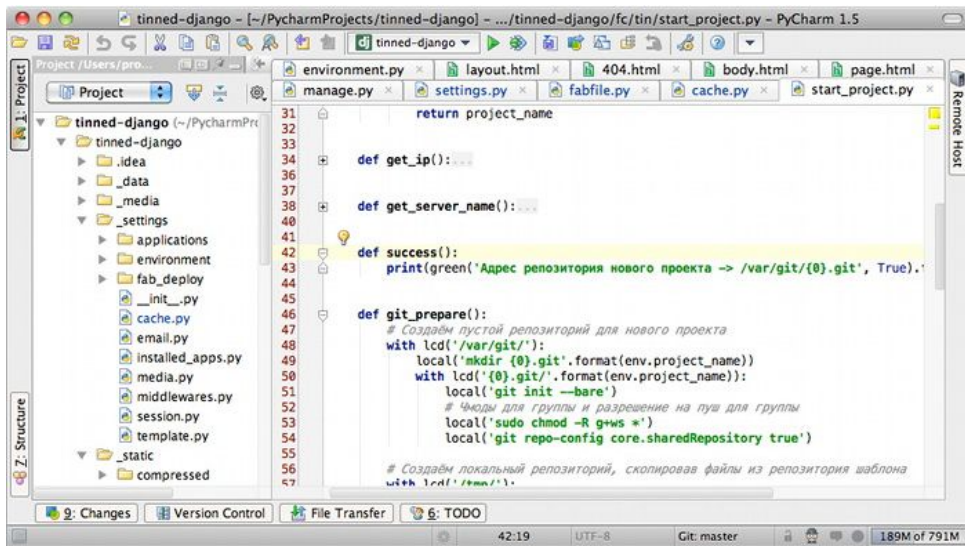

- Command line/REPL

```

```

# Different ways to use Python

- Integrated Development Environment (IDE) – Spyder, pyCharm, pyDev, Sublime, ...
- File editor (e.g. Atom, vim) + command line tools (pip, virtualenv, ...)

# Different ways to use Python (continued)

- "Notebooks":

- Jupyter notebooks

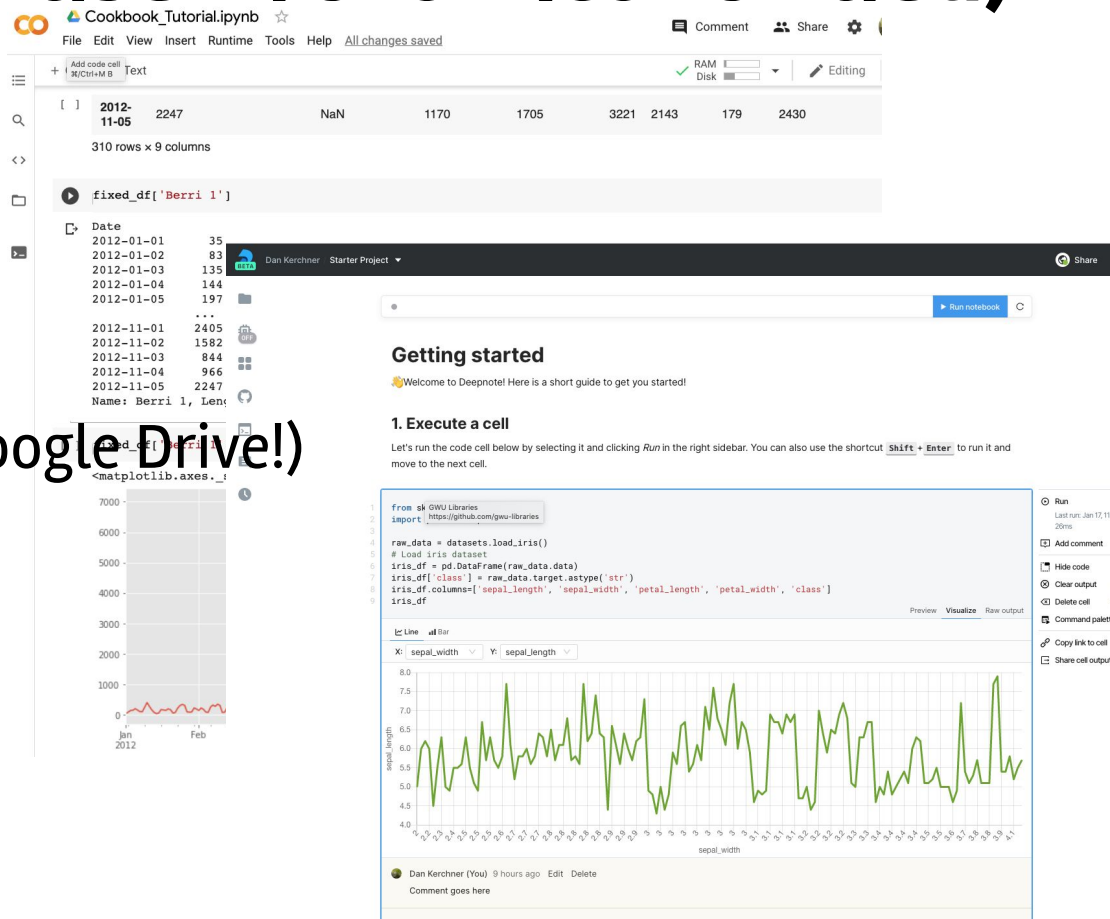

- Google Colab

(available in your Google Drive!)

- Kaggle notebooks

- Deepnote

- Binder

# Even more ways to use Python

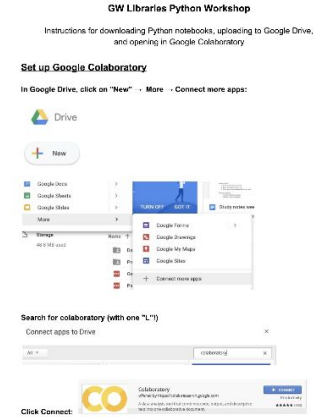

Anaconda = Python (and R) plus:

- **Jupyter notebooks**
- lots of libraries
  - data processing
  - analytics
  - scientific computing
  - including: **Pandas**

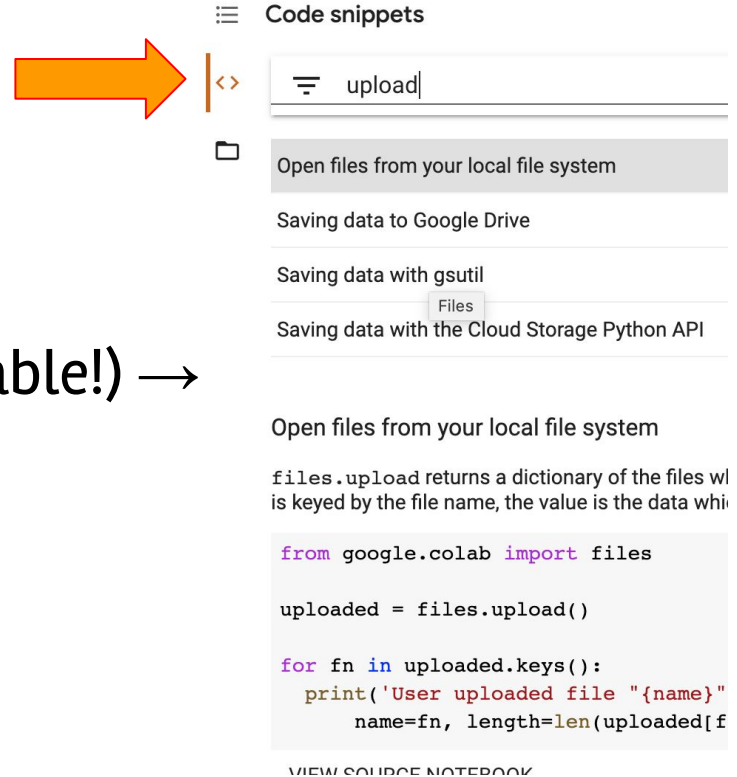

# Setup

- Google Colaboratory  
<https://colab.research.google.com>
- Backup plan: <https://jupyter.lai.gwu.edu>

# Uploading Data (and doing other things) in Google Colab

Use "Code Snippets" (searchable!) →

# Some recommendations

- Write assuming your code will be read (incl. by Future You)
- Version your code  **GitHub**
- Learn to be "Pythonic" in your style
- Isolate your projects from each other – use venv
- Stuck? Try an Internet search
- Which version of Python are you using?
- Find good code examples and make them work
- Keep learning!

# Some Python libraries/frameworks

|  |   |
|--|---|
| Building web applications  | Django<br>Flask   |
| Scientific/numerical   | Numpy<br>Scipy<br>Pandas  |
| Machine Learning   | scikit-learn, tensorflow  |
| Data Visualization<br>(check out<br><a href="http://www.python-graph-gallery.com">www.python-graph-gallery.com</a> ) | matplotlib<br>bokeh<br>ggplot (like ggplot2 in R)<br>plotly (<- interactive)<br>seaborn |
